

DECK SOLUTIONS CHEAT SHEET

Pressure-Treated Wood

VS.

Composite Decking

MATERIAL TYPE	MATERIAL DETAILS	COST*
Pressure-Treated Wood	<ul style="list-style-type: none"> • Best way to get real wood aesthetics (because it is real wood!) • Takes stain and waterproofing easily. • Wide variety of stain colors available. • Can warp and crack; susceptible to mold and mildew • High maintenance; requires resealing and re-staining. 	Approx. \$3-10 per square foot
Composite	<ul style="list-style-type: none"> • Made from a combination of plastic and wood. • Durable and long-lasting. • Available in many colors and textures. Most wood-like qualities of non-wood options. • Mold and mildew resistant. • Stain and fade resistant. • Product warranties available. <p>RCI Builders Showroom carries two kinds of composite decking: DuraLife and Trex.</p>	Approx. \$10-20 per square foot

*Includes surface boards, fasteners, and fascia. Additional costs on stairs and railing.
